

## Job Ad

# Electronic Engineer

## Engineering

### **Do you see opportunity everywhere in anywhere connectivity?**

Then come and propel your career at Myriota, where the Internet of Things (IoT) meets Space!

At Myriota, we make anywhere connectivity possible using our patented direct-to-satellite technology. Unlike traditionally expensive, power draining satellite solutions, our capabilities are designed for the demands of IoT, namely secure, low-cost, low maintenance and really (really) long-battery-life.

Due to growth and expansion we're excited to be hiring for an Electronic Engineer.

### **About the role**

This is a cool role! You will get to work across a broad range of electronic and product development disciplines.

- Work with customers to develop solutions to their needs
- Execute on the product roadmap across a wide range of experiences including RF design, digital and analog engineering, CAD, testing, compliance and product design
- Not just a once-off - you will be building, designing and developing products for everywhere, everyday use in the millions

## Stuff we'll trust you to do

- Design, test, & migrate into manufacture products bearing the Myriota logo
- Tackle some world-class RF, electronic design and integration challenges
- Work and help our customers realize their products quickly and elegantly

## Stuff we'll like about you

You might have some of these skills, knowledge and experience when applying for this job:

- Product development experience, especially in electronics, RF, mechanical integration and test
- Ability to communicate with customers, understand their needs first then design
- Pride to see your product “out there” in the wild making a difference to humanity
- Drive for quality, manufacture and experience in delighting customer needs with a great technical solution

### ***Are you hesitating to apply because you don't think you meet all of the criteria?***

If you believe you are aligned with our values at Myriota, we'd encourage you to still click on that apply button so we can explore your unique skill set and the value you could add to one of our teams

## Share our values?

### Think Big

This is the attitude that shapes our bold vision and hunger for innovation. It's the way we see the world and what drives us to redefine space-based communications.

Associations: Global, Ubiquitous, Initiative, Leaders, Innovative, Unique, Ambitious, Inspirational, Satellites

### Simplicity Works

As much as we dream big for our company, we understand success relies on keeping things simple. In this fast moving, technology-driven market of ever-increasing complexity, our practical approach is what sets us apart from the rest.

Associations: Friendly, Usable, Low Cost, Easy, Design, Creative, Insightful, Accessible

### Keeping it Real

Born from a genuine desire to connect remote areas that were previously left behind, our wish to create change for good still guides us in all areas of our business.

Associations: Genuine, Real, Secure, Affordable, Useful, Trusted, Flexible, Courageous

### In It Together

Connection is part of Myriota's DNA. It's not only what we do, it's how we do it. We have real empathy for our customers and work with them to create affordable, custom solutions for their business challenges.

Associations: Generous, Supportive, Respect, Inclusive, Committed, Integration, Partners, Reliable
