

Tank monitoring, simplified.

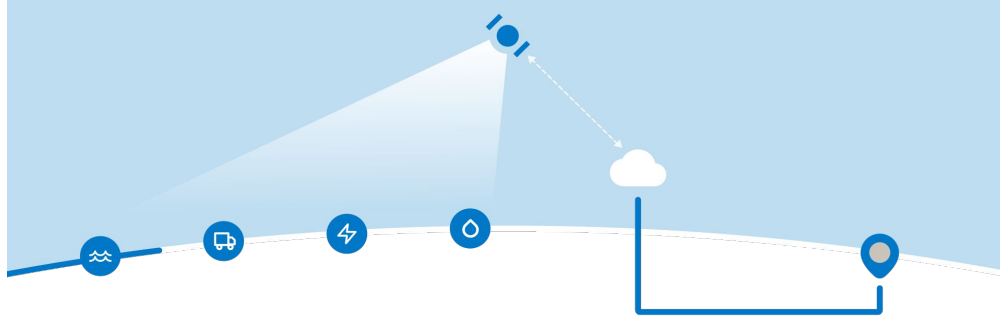

Myriota

Connect to the Myriota Network for low-power tank monitoring deployment that works anywhere.

- Connect anywhere ➔ See sky, get connected
- Fast, simple install ➔ Sub 10 mins
- Long in-field life ➔ 5 - 10 years
- Low monthly monitoring cost ➔ Single digit \$
- Low maintenance costs ➔ Remote update
- Small, lightweight form factor ➔ 250g excl. battery*

*Implementation specific example, discuss your requirements with a Myriota expert

Direct to satellite comms made easy

- 1. Tank Monitoring Devices**
 In-field devices record tank sensor data.
- 2. Wake and Send**
 Myriota Module wakes as the satellite passes and sends data.
- 3. Cloud Transfer**
 Satellite receives and forwards data to the Myriota Cloud.
- 4. Data Distribution**
 Data is immediately distributed to the configured client cloud or server.
